

## Reference list for using Profi-Tap C1AP-100 with older or newer versions of wellknown Analyzers

The Profi-TAP C1AP-100 is designed to work with 3rd Party software Analyzers like EtherPeek or Wireshark and many many more. With the Product comes a USB-key providing the current version of necessary drivers to install on your Laptop or stationary PC. Refer to our [Download page](#) for latest available drivers.

The below listing will be updated frequently.

Analyzer's Name	WebSite Vendor	OS Versions supported	tested
<b>"Automation World" :</b>
